

PE Premium at Colindale Primary School 2017/2018 Evaluation

PE & Sports Leader: Lianne Nuttall

2017/2018 objectives

1. To increase the fitness and wellbeing of all children.
2. To raise awareness of a healthy lifestyle.
3. To promote and raise the profile of sport and physical activity across the school and in the local borough.
4. To ensure PE lessons and physical activities are of a high quality.
5. To improve the skill levels of children in key sports.

1. To increase the fitness and wellbeing of all children.

2. To raise awareness of a healthy lifestyle.

- The Daily Mile - good attendance at least 30 children from each year group attend every week. Many children from the school sports teams attend in order to improve their fitness.
- Lunchtime activities - Specialist sports coaches lead football, basketball and multi skills sessions every lunchtime throughout the year. This has helped to develop team, gross motor and specific sports skills; introduce children to sports they would not usually get involved in; and engaged more children in an active lifestyle.
- Sports Superstars- sports leaders who lead activities at lunchtimes, sports day, assemblies. This has ensured greater participation in sports activities during lunchtimes.

3. To promote and raise the profile of sport and physical activity across the school and in the local borough.

5. To improve the skill levels of children in key sports.

Specialist coaching has been provided by coaches from Woody's Academy for key sports such as football, cricket, basketball and athletics. This has provided high quality teaching and has enabled Colindale to perform brilliantly in leagues (boys won 2, drew 4 and finished 6th, girls won 1, drew 1 and finished 4th) and competitions (girls qualified through the South division to compete in the Barnet tournament). This great season has raised the profile of Colindale within Barnet and within the school. More staff are asking about the teams, asking the teams directly how they have done, large up take in Year 4 trials.

4. To ensure PE lessons and physical activities are of a high quality.

- Replenishing PE and Sport equipment in order to provide high quality lessons and sports training has proved to be worthwhile and added to the experience of the children.
- Lesson observations have shown that PE across the school is of a good quality or higher; teachers demonstrate secure subject knowledge, differentiate appropriately and there is good progression within lessons.
- Gymnastics professional development - This need was highlighted by PE audits undertaken in the Autumn. As a result Kim Henderson (Barnet PE consultant) supported teachers over 3 sessions to develop their gymnastics teaching. All teachers benefited from this support and have reported that they have found the following most useful:-

- Pace
- Equipment safety
- Organisation of groups
